This grammar of Dumi contains a description of the phonology, morphology and syntax, as well as tables of regular and irregular verbal conjugations, a Dumi-English dictionary and a corpus of morphologically analysed Limbu texts with English translation. These texts include oral traditions and myths as well as transcriptions of actual conversations. An account is given of Dumi shamanism, the pantheon and belief system regarding the supernatural, Dumi rituals, eschatology and the kinship system. The most closely related languages to Dumi are Khaling and Kohi..
