

ISW Colloquium – Spring Semester 2024

04.03.2024 | 16:00-17:00 | UniTobler F -111 (U1)

Ilja Seržant (U Potsdam):

Towards a diachronic typology of DOM

In this talk, I will focus on some specific diachronic aspects in the evolution of DOM systems. First, I will present the most frequent developmental paths of DOM systems and then discuss some of them. Then, I will talk about the supposedly frequent development of DOM systems from datives (i.e. indirect-object-markers) and, finally, I will discuss the role of ambiguity resolution in the development of DOM.
